Employers

- **Snowfish**—Stockholm, Sweden
Software development: March, 2007–Present
 - Worked within all stages of a growing stack of web based systems.
 - Responsible for application design, implementation, support, documentation, testing, packaging, deployment, hosting, security and surveillance.
 - Designed, implemented and evolved multiple applications and services mostly using Java, Jboss, Hibernate/MySQL, HTML/CSS and GWT.
 - Created Debian based deployment using APT with Jboss/application packaging.
 - Developed/Supported Wordpress based sites with custom themes/plugins using PHP, HTML, CSS, JavaScript, jQuery
 - Designed and evolved software life cycle workflows for small teams (3-5 people)
 - Designed client based application platform using CoffeScript (js) + libraries with custom build management using Cake/Node.
- **Transcom**—Kungsör, Sweden
Technical support/customer service: December, 2001–February, 2007
 - Primary position answering incoming calls regarding technical Internet support questions related to software and hardware.
 - Also worked with incoming calls and callbacks regarding bills, technical aspects of mobile Internet connections, IP-Telephony and some Second Line Support work.
 - Learned to work within a large organization with rapid changing products and services.
 - What I value the most from this job was learning a lot about common misconceptions of how software and computers works which I still value a lot.

Other activities

- To varying degrees been involved with non profit organizations and contexts around social/cultural politics, the Art world.
- Amongst other things co-represented Kopimi / Piratbyrån at Manifesta 7 and the Vennice Biennale 2009.
- Been DJing / VJing / Making videos / Internet art / Performances to various degrees since the late 1990's.

On skills and knowledge..

- To stay **proficient in something** means long term diversified exposure.
- To be **familiar with something** implies regular solving of non trivial tasks.
- To be **acquainted to something** requires knowledge, but in a narrowed scope.
- Everything evolves. Keep a sharp and intuitive mind for *something* by being active.
